

**REMARKS**

Claims 1-22 have been allowed. Applicants have amended the specification to address the Examiner's objections thereto. Accordingly, no new matter has been added.

**Specification Objections**

The Examiner objected to the specification because the Summary of the Invention references the claims. The Examiner also stated that the Summary of the Invention should be just a summary. The Examiner further stated that the Background of the Invention should refer to a prior art by its patent number, not by "patent reference 1". Applicants respectfully traverse the objection in view of the foregoing amendment.

Applicants have amended the Summary of the Invention such that it does not reference the claims and is shorter in length. Applicants further amended the Background of the Invention such that it refers to a prior art patent by its patent number.

Accordingly, it is respectfully requested that the objection to the specification be withdrawn.

**Conclusion**

In view of the above amendments and remarks, Applicants respectfully submit that the present application is in condition for allowance.

Respectfully submitted,

**KIICHIRO YAMADA *et al.***
